Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Gibson et al (US 5,557,596) cited by Applicant.

Gibson et al., according to Figs. 2-5, show a storage device comprising: a data storage layer (see Fig. 5) having a data storage area (356) with data stored thereon; a light beam emitter (102, 104) for selectively directing a beam of light toward the data storage layer to read said data from the data storage area; the storage layer being partially transparent to the beam of light and the storage area filtering the amount of light passing through the storage layer; a layer (a layer disposed adjacent to storage layer 352) adjacent to the data storage layer (see Fig. 5) in which carriers are generated in response to the amount of light reaching the adjacent layer; and a detection region in carrier communication with the adjacent layer for measuring (see meter 358) the carrier transport in the detection region to determine the state of the storage area (see column 7, lines 50-53) as recited in claim 1 and corresponding method claim 15.

Regarding claims 2-14 and 16-20, see respective disclosure of Figs. 2, 3 and 5.
